<u>GS1-DataBar</u>	<u>GS1 DataBar Omni/Truncated</u>  (01) 0 0614141 00001 2 <u>GS1 DataBar Stacked/Stacked Omni</u>  (01) 0 0614141 00001 2 <u>GS1 DataBar Limited</u>  (01) 0 0614141 00001 2 <u>GS1 DataBar Expanded</u>  (01) 0 0614141 00001 2 <u>GS1 DataBar Expanded Stacked</u>  (01) 0 0614141 00001 2 The only difference between Omni(directional) and Truncated is that the bar height is taller for Omni and shorter for Truncated. GS1 DataBar Stacked implies it is truncated.
GS1-Composite	EAN/JAN-8 with CC-A  1234 5670 1234567021A12345678 EAN/JAN-13 with CC-A  3 312345 678903 3312345678903991234-abcd DataBar Limited with CC-A  01131123456789061701061510A123456 DataBar Limited with CC-B  010351234567890721abcdefghijklmnopqrstuv GS1-128 with CC-C  (01)03812345678908(10)ABCD123456(410)3898765432108 GS1 DataBar and GS1-128 as part of the composite contains a link character indicating the existence of the composite code. EAN/JAN does not contain such a link. Therefore it is normal that the above EAN/JAN CCA samples may output the 1D only when the composite is not decodable.
